Original Sheet No. 1.1

Effective: October 29, 2007

DEFINITION OF TERMS

Definition of Terms

Access Line – The connection allowing messages, data or packets to travel between the Central Office and the subscriber's premise. This connection ends at the Demarcation Point on the customer's premise.

Base Rate – The monthly rate that applies for a specific grade and class of exchange service for customers located within a base rate area.

Base Rate Area – That portion or portions of an exchange whereby the density, demographics and geographical characteristics result in similar cost characteristics allowing specified classes and grades of basic exchange service to be furnished at base rates that are similar and do not require zone or mileage charges.

Central Office (CO) – A building, power, and switching unit providing telecommunications services to the general public, designed for terminating and interconnecting lines and trunks.

Central Office Connecting Facilities – A facility furnished to an Other Common Carrier by the Company between the terminal location of the Other Common Carrier and a point of connection on the Company premises.

Centrex Service – Centrex Service is a central office based service which is furnished subject to the availability of facilities, features and central office equipment in locations determined by the Company. The service does not include any customer premise equipment.

Changed Number Announcement (CNA) Service – Changed Number Announcement Service includes all intercept recordings that provide new number information when a customer changes their local phone number.

Channel – A communications path provided by the Company between two or more locations.

Circuit – A channel used for the transmission of electrical or optical signals.

Company – Refers to Dubois Telephone Exchange, Inc.

Customer – A person, firm, corporation, non-profit organization, or governmental agency for whom service is rendered and who is responsible for paying the telephone bills and for complying with the rules and regulations of the Company.

Customer Provided Equipment (CPE) – Devices, apparatus and their associated wiring provided by a customer for use with facilities furnished by the Company.

Digital Switch Service (DSS) – Digital Switch Service (DSS) provides digital exchange service for customers at a DS-1 level. DSS provides connectivity between the customer's premise and the central office through a DSS channel termination (1st Mile and Additional Mile) and a DSS switching charge. Access from the local exchange and toll networks is provided through these circuits as subscribed to by the end user.

DEFINITION OF TERMS

Definition of Terms (cont'd)

Direct Inward Dialing (DID) Service

A. General

1. Direct Inward Dialing Service to customer premises located switching systems is furnished subject to the availability of telephone numbers.
2. The service includes the central office switching equipment necessary for direct inward dialing from the exchange and long distance message telecommunications network directly to terminal equipment associated with customer premises located switching systems.
3. The service must be provided on all lines in a trunk or network access line group arranged for inward service. Routing of calls to selected numbers within the direct inward dialing number group over a separate trunk or network access line group is not contemplated.
4. Operational characteristics of interfaces signal between the Company-provided connecting arrangements and the customer-provided switching equipment must conform to the rules and regulations the Company considers necessary to maintain proper standards of service.
5. The Company shall not be responsible to the customer or to the customer's patron if changes in protection criteria or in any of the facilities, operations or procedures of the Company render any facilities provided by a customer, or its patrons obsolete or require modification or alteration of such equipment.
6. Direct-in-dial Trunks may be provided in the quantity determined by the Company to be sufficient for adequate service, only in exchanges where the Central Office is equipped for such service. When otherwise provided, Direct-in-dial Trunks will be furnished at rates based on cost.
7. Directory listings will be provided to allow one free listing per pilot of 100 numbers. Directory listings will not be provided without charge for numbers issued for DID service. Customers desiring listings for these numbers in the telephone company directory may purchase listings they desire.
8. The provision of this service requires the customer subscribe to a sufficient number of trunk facilities to adequately handle the volume of incoming calls.

Price Schedule

Wyoming

Issued: September 17, 2007

Original Sheet No. 1.3

Effective: October 29, 2007

DEFINITION OF TERMS

Definition of Terms (cont'd)

Drop Wire – Facility between the Company's distribution terminal and the network interface device located on the customer's premise.

Entrance Facility – Facilities between the Company's distribution terminal and the network demarcation point and/or campus backbone of a business park or interexchange company premises.

Exchange – A geographical unit, established by the Company, for the administration of telecommunication services in a specified area.

Exchange Access Line Types

- Individual or party line main telecommunications service.
- Multiline telecommunications service – an offering of individual lines for termination, at the customer's premises, in a Multiline Telecommunications System.
- Trunk line service – an offering of access lines which connect an automatic call distributing system, PBX system, or other (dial) automatic switching system at the customer's premises to the central office.

Extended Area Service – An area encompassing the local service area where the customer is physically located plus any exchanges identified for which no toll charges will be assessed.

Flat Rate Service – An exchange service for which a specified rate is charged, regardless of the amount of local use.

Foreign Exchange Service (FX) – A service whereby dial tone is provided from a wire center in an exchange from which the customer is not normally served or where the customer is located outside an exchange in unassigned territory. This service is available to either residence or business customers but will not be provided for resale.

Hybrid System – A hybrid communication system is a system that can be arranged to combine PBX and Multiline Telecommunications Service features through the common equipment or can be arranged to provide solely PBX or Multiline Telecommunications Service features.

- The application of exchange access line rates to a hybrid system depends upon the usage of the lines. Where access lines are used to provide pooled access for outward calls to the general exchange network, trunk rates apply. Where direct button or key access is required for outward calls to the exchange network via a specific line, individual line rates apply.

Price Schedule

Wyoming

Issued: September 17, 2007

Original Sheet No. 1.4

Effective: October 29, 2007

DEFINITION OF TERMS

Definition of Terms (cont'd)

Interexchange Services – A variety of services that extend to and/or from two or more exchange boundaries.

Interexchange Telecommunications Company – A person, firm or corporation providing telecommunications service to connect end users located in different local exchange areas, but excluding companies which also provide noncompetitive local exchange services.

Local Exchange Service – The furnishing of telecommunication services to the Company's customers within a local service area.

Local Service Area – The geographical area throughout which a subscriber obtains telecommunications service without the payment of a toll charge.

Locality Rate Area – An area of concentrated development located outside and remote from the base rate area but within an exchange area and within which local telecommunications service is furnished at incremental rates.

Maintenance of Service – Maintenance of Service denotes an occurrence of a visit to a customer's premises in connection with a service difficulty when it is determined that the difficulty is due to a condition in customer-provided facilities, terminal equipment, a communication system or for customer-maintained premises wire. When a Maintenance of Service visit is made, premises work charges will apply.

Message Telecommunication Service (MTS) – MTS, also referred to as "toll" and "message toll", is that of furnishing facilities for telecommunication between stations in different local service areas, within a LATA, in accordance with the regulations and system of charges specified. The message charges are in payment for all service furnished between the calling and called stations.

Multi-Line Hunt Service – A service which is available for business and residence local exchange service where more than one line is in service. This service provides hunting over two or more lines in a designated hunt line group when the pilot number line is busy. Hunting is performed only when a pilot number of the hunt group has been dialed/keyed. Hunting for an idle number is performed in the same order each time.

Network Interface Device (NID) – A device wired between the telecommunications protector and the inside wiring to isolate the customer's equipment from the network.

Network Interface – The point of interconnection between Company communications facilities and terminal equipment, protective apparatus or wiring at a customer's premises. The network or demarcation point shall be located on the customer's premises within 12 inches or a similarly reasonable distance of the protector, or where there is no protector, no further than 12 inches of where telecommunications facilities, cable and/or wire enters the customer premises. The network interface shall consist of a standard FCC registration jack or its equivalent, which is installed, owned and maintained by the Company at the customer's premises.

Price Schedule

Wyoming

Issued: September 17, 2007

Original Sheet No. 1.5

Effective: October 29, 2007

DEFINITION OF TERMS

Definition of Terms (cont'd)

Non-Recurring Charge – A one-time charge associated with establishing, installing, programming, changing, or modifying service.

Off-Premise Extension Service – The appearance of an actual telephone line in two physically separate locations

Payphone Service – Payphone Service includes lines to which coinless, card reader or a combination of card reader telephones may be attached. Payphone Service is a two-way or, optionally, one-way originating only business exchange access line composed of the serving central office line equipment, all outside plant facilities needed to connect the serving central office with the customer's premises, and the Network Interface Device at the demarcation point. These facilities are Company-provided and maintained and provide access to and from the telecommunications network for long distance service and local calling.

Primary Rate Interface (PRI) – Integrated Services Digital Network (ISDN) is a public network-based set of communications services that make it possible to send, receive, and modify information using regular telephone facilities. ISDN provides end to end digital communications and gives the ability to transmit data and voice over the same telephone line simultaneously. This functionality is provided via channelized transport facilities. The ISDN architecture provides for Primary Rate Interface (PRI) which is typically used when a customer wants to connect large quantities of digital line to the network.

Private Branch Exchange (PBX) – A switching system that provides internal communication between lines located on a customer's premises, or the customer's off-premises location, as well as connection to the communication network.

Public Telephone Service – An exchange service installed for the convenience of the public at a location chosen or accepted by the Company.

Same Building – Same building means a structure under one roof, or two or more structures under separate roofs, throughout which there is general access by means of doors, elevators, stairways, enclosed passageways or continuous corridors. Sidewalks, driveways, heating and utility tunnels, pipes and conduits are not considered enclosed passageways.

Same Household – Refers to all who dwell as a family under one roof, including relatives and not more than four other persons residing with the family and participating in the common use of such facilities as dining room, kitchen, living room, etc. Premises occupied by any group of four or less persons functioning in the same manner as a family are also considered as the same household.

Same Premises – References all of the space in the same building in which a customer has the right of occupancy to the exclusion of others or shares the right of occupancy with others; and all space in different buildings on continuous property, provided such buildings are occupied solely by one customer. Foyers, hallways, and other space provided for the common use of all occupants of a building are considered the premises of the operator of the buildings.

DEFINITION OF TERMS

Definition of Terms (cont'd)

Special Number Assignment – Special Number Assignment is a specific number requested by the customer. This service is available where facilities are accessible and it is technically feasible to provide. This feature is an additive to the CO Implemented Coin Line or to the Instrument Implemented Payphone Service.

Subscriber – A person or agency subscribing for telecommunications service. As used in this Price schedule, a separate subscriber is involved at each location, on continuous property, where service is furnished. One individual or firm therefore may be considered as two or more separate subscribers, even in the same Exchange. The privileges, restrictions, and rates established for a subscriber to any class of service are limited to the service at one location; no group treatment of service at separate locations furnished to one individual or firm is contemplated or to be implied except when definitely provided for in the specific service descriptions in the price schedule.

Toll Message – A message from a calling station to a station located in a different local service area.

Toll Service – Telecommunications service rendered by the Company or other Common Carriers between patrons in different local service areas in accordance with the rates and regulations of the company providing service.

Trunk – An interoffice or intra-office facility providing a telecommunications channel between two switching entities.

Zone Areas – That portion of an exchange extending beyond the base rate area for which flat rate or mileage charges are assessed in addition to the base rates.

CENTREX SERVICE

Centrex Service

- A. Description
1. Centrex Service is a central office based Touch-Tone service which is furnished subject to the availability of facilities, features and central office equipment in locations determined by the Company. The service does not include any customer premise equipment.
 2. Each Centrex line may be arranged for two-way, one-way incoming or one-way outgoing operation depending upon the option chosen by the customer at the time the line is installed. When a change in the arrangement is requested by the customer, the appropriate service charges as specified under Service Connections and Nonrecurring Charges section of the Company's Exchange Tariff apply.
 3. Centrex Service is not provided in association with public or semi-public telephone service.
 4. Centrex Service may be provided in association with trunks; however, lines terminating on a key or PBX system will be charged at the applicable trunk rate.
 5. Service charges as specified under Service Connections and Move and Change Charges of the Company's Exchange Tariff apply to all station line installations, customer requested moves, changes and rearrangements performed by the Company.
 6. Terminal equipment provided by the customer must be compatible with the services and equipment provided by the Company. Such equipment must be Touch-Tone capable.
 7. All applicable end user fees and surcharges will apply to each line.
 8. Directory Listings will be furnished subject to the rates and regulations pursuant to Company policy.
 9. Service will be provided on a month-to-month basis at the rates as specified above. These rates are in addition to the applicable local service rate specified in Section 4 of the Company's Exchange Tariff.
 10. Regulations as specified in the General Rules and Regulations section of the Company's Exchange Tariff will apply to this service
 11. All exchange lines in a system must be served by the same central office and have the same billing arrangement.

CENTREX SERVICE

Centrex Service (cont'd)

B. Definitions

Call Forward - The Call Forward feature allows a customer to have incoming calls to a station automatically forwarded to a predetermined telephone number.

Call Pickup - Call Pickup allows a station to answer incoming calls to another station within a defined call pickup group.

Call Transfer - A station with this feature can hold and transfer incoming, outgoing, and intragroup calls.

Call Waiting - With this feature, an incoming call encountering a busy station receives audible ringing. The called busy station receives a call waiting tone. The called busy station may then acknowledge the incoming caller and place the existing caller on hold, then alternate between the callers, or abandon one of the calls.

Consultation Hold - Consultation Hold allows the transferring party to talk privately with the destination before transferring the call or establishing a Three-Way Conference/Transfer.

Speed Call - This feature allows a user to place calls to a previously designated list of up to 6 or 30 frequently dialed numbers.

Three-Way Calling (Conferencing) - A station is allowed to establish three-way conference calls beyond the limits of the transfer type defined for the customer group.

Station-to-Station Calling - A call may be placed from one station to another within the Centrex group without going through the switchboard.

Last Number Redial - This feature enables a customer to redial the last number called by depressing a single key rather than the entire number.

Directory Number Hunt - This feature uses a prearranged sequence to let incoming calls "hunt" for idle lines.

Distinctive Call - Distinctive Call Waiting Tone identifies the Waiting Tone source of an incoming call to a station by using three different ringing and Call Waiting Tone signals.

Transfer - With this feature, a call that is transferred by a station to the attendant by either flashing or by flashing and dialing zero is queued on a first-in, first-out basis.

CHANGED NUMBER ANNOUNCEMENT SERVICE (CNA)

Changed Number Announcement Service

A. Description

Changed Number Announcement Service includes all intercept recordings that provide new number information when a customer changes their local phone number.

B. Regulations

1. Changed Number Announcement Service is provided on accounts that have a record listed in the directory or on directory assistance. It is not provided with Centrex, DID or 800 service.
2. Changed Number Announcement Service is provided to customers up to 3 months.
3. Changed Number Announcement Service applies to temporarily or permanently disconnect numbers, including vacation suspension service and telephone number changes.
4. Changed Number Announcement Service is subject to the availability of the disconnected number and the availability of CO facilities.
5. The minimum service period for Changed Number Announcement Service is 1 month. The service is provided at no charge for a period of 1 month. Charges for the service beyond the initial period can be found below.
6. Applications for Changed Number Announcement Service will be accepted only from the customer representing the appropriate authority to order the Intercept service.
7. The Company will be held harmless from any claims which may arise out of the Company's provision of Changed Number Announcement Service.

CUSTOM CALLING, CLASS SERVICE, AND ENHANCED CALLING FEATURES

Custom Calling, CLASS Service, and Enhanced Calling Features

A. General

Custom Calling, CLASS Service, and Enhanced Calling Features (“Features”) consists of one or more of the following optional features which provide special kinds of communication features on individual service lines. Features are available only with one party business and residence service in central offices which, at the Company’s option, are appropriately equipped and facilities are available. Some Features require Signaling System 7 (SS7) hardware and software for interoffice operation. This interoffice functionality is only provided upon availability of facilities.

B. Descriptions

1. Features

- a. Anonymous Call Rejection (ACR) – Allows customer to reject calls from which the identify of a calling number has been intentionally blocked. Rejected calls are sent to a recording. Notification of when or how many calls have been rejected is not provided.
- b. Automatic Call Back (ACB) – Allows a customer to automatically redial the last number called from their line for up to 30 minutes. This applies whether the call was answered, unanswered or encountered a busy condition. ACB may be canceled prior to the 30 minutes elapsing.
- c. Automatic Line (AUT) – Provides an automatic connection between a calling station that goes off hook and a pre-assigned directory number.
- d. Automatic Recall (AR) – Enables a customer to automatically redial the calling party of the last incoming call whether the call was answered or unanswered if the call line is available. The number will be checked up to 30 minutes.
- e. Call Forward (CFW) – Allows customer to forward all calls to a 7 to 10 digit directory number. Once CFW is activated, all calls are forwarded to the designated directory number until deactivation. When CFW is in effect, the telephone from which calls are being forwarded rings once for each incoming call as a reminder but cannot be answered as long as CFW is activated.
- f. Call Forward Busy (CFB) – Allows customer to program the base phone to be forwarded only when a busy condition is encountered. The forwarded to number can be changed as often as necessary. If the forward to directory number is a toll call, the base phone will incur a toll charge.

CUSTOM CALLING, CLASS SERVICE, AND ENHANCED CALLING FEATURES

Custom Calling, CLASS Service, and Enhanced Calling Features (cont'd)

B. Descriptions (cont'd)

1. Features (cont'd)

- g. Fixed Number Call Forwarding (FNCF) – Allows a phone number to be forwarded through programming in the central office switch.
- h. Call Forward No Answer (CFD) – Allows customer to program the base phone to be forwarded after a specified number of rings. The forward to number can be changed as often as necessary. If the forward to directory number is a toll call, the base phone will incur a toll charge.
- i. Call Forward Remote Access (CFRA) – Allows customer to activate or deactivate the call forward feature from a remote location by dialing a dedicated base directory number. This feature requires touch-tone service at the remote station.
- j. Calling Number Blocking – Calling number blocking will automatically block delivery of the calling party's number on all calls. This feature is available upon request, at no charge, to established shelters of domestic violence intervention agencies, state and county departments of human resource shelters, law enforcement agencies, their employees and volunteers, or individuals where it is certified that the personal safety of these employees or individuals will be jeopardized. The calling number will not be transmitted from a line equipped with this feature
- k. Calling Number Delivery (CND) – Allows customer to receive the calling number on incoming calls. Calling numbers will not be displayed if the call originates from an area that does not have the appropriate network signaling connections.

Telephone numbers transmitted via CND may not be sold or given to another party without the caller's consent. Calling number information may only be used for: a) routing or completion of calls, b) billing of calls, c) account management purposes, d) services directly related to the call or transaction, e) verification of calling party identity and f) marketing products or services that are directly related to those previously acquired by the customer from the number delivery services subscriber. CND customers failing to comply with any of these conditions will have their service terminated.

Subscription to CND requires the lease or purchase of a display telephone or an add-on display unit by the customer.

CUSTOM CALLING, CLASS SERVICE, AND ENHANCED CALLING FEATURES

Custom Calling, CLASS Service, and Enhanced Calling Features (cont'd)

B. Descriptions (cont'd)

1. Features (cont'd)

- l. Calling Name Delivery (CNAM) – Allows customer to receive the calling name on incoming calls. The name is delivered to the called party's CPE in the interval between the first and second ring. Calling names will not be displayed if the call originates from an area that does not have the appropriate network signaling connections. This may exclude calls made from most cellular phones, calls made through some interexchange carriers, and calls originated from other local exchange carriers. If the caller is calling from a multi-party line, or is blocked, the name will not be displayed.

CNAM will be provided in connection with single residence and business lines where Telephone Company facilities permit.

- m. Call Transfer (UTF) – Allows the customer to transfer a call to another number, establishing a connection between two other parties. The customer does not need to remain on the line for the other two parties to remain connected.
- n. Call Waiting (CWT) – Alerts a subscriber who is on an established call that a third party is trying to call. The called party may either ignore the waiting call or answer the call. The customer can alternate between the two parties.
- o. Call Waiting Enhanced (CWTE) – Allows customer to prevent call waiting tones from being applied to the line on a per call basis. Incoming calls to the busy line will receive a busy tone. CWTE will be deactivated when the call is terminated.
- p. Caller ID/Call Waiting – This service displays the identity of an incoming (calling) number even during a subscriber line busy condition so long as the identity of the calling number has not been blocked. This service requires a Caller ID/Call Waiting enable display device.
- q. Distinct Ringing (DSR) – Allows two directory numbers to be assigned to a single-party line. Each directory number is assigned a unique ringing pattern so that the nature of the call can be determined. Subscribers who also have the Call Waiting feature assigned to their line receive distinctive Call Waiting tones for each directory number. Subscribers who also have Call Forwarding assigned to their line have two options: a) both telephones can be forwarded to the same directory number when Call Forward is activated or b) only the main or master number can be forwarded when Call Forward is activated.

CUSTOM CALLING, CLASS SERVICE, AND ENHANCED CALLING FEATURES

Custom Calling, CLASS Service, and Enhanced Calling Features (cont'd)

B. Descriptions (cont'd)

1. Features (cont'd)

- r. Distinctive Ringing / Call Waiting (DR/CW) – Notifies the subscriber of important callers with a special ring. The customer establishes a list of numbers where if the calling number is on the list, the subscriber will hear a special ring. All other calls will have a normal ringing pattern. If the customer has Call Waiting, a special Call Waiting tone will be heard. All other calls will be announced with the normal Call Waiting tone.
- s. DTEen Line – A residence function which allows the user to program a unique ringing pattern when calls are received from phone numbers on a specified list. The customer is able to change this list from their touch tone phone.
- t. Long Distance Alert – This service places a distinctive ring pattern on all incoming long distance calls.
- u. Personal Intercom – Allows the customer to contact an extension phone by dialing their own number and then hanging up.

Distinctive Ringing Revert – This feature applies a distinctive ring to a revert call.
- v. Remote Call Forwarding Appearance (RCFA) – Allows an assigned telephone number to be forwarded full time to another number. This forwarding is performed in the central office and is constant. Programming for RCFA is performed by the Telecommunications Company at the request of the customer. Calls forwarded to a toll location will be billed at the applicable toll rates to the RCFA customer.
 - (1) RCFA service is not offered where the terminating station is a coin telephone.
 - (2) The Telecommunications Company will not provide identification of the originating telephone number to the RCFA customer.
 - (3) Transmission characteristics may vary depending on the distance and routing necessary to complete the remotely forwarded call

CUSTOM CALLING, CLASS SERVICE, AND ENHANCED CALLING FEATURES

Custom Calling, CLASS Service, and Enhanced Calling Features (cont'd)

B. Descriptions (cont'd)

1. Features (cont'd)

v. Remote Call Forwarding Appearance (RCFA) (cont'd)

(4) RCFA service is not suitable for satisfactory transmission of data.

(5) RCFA service is available when used in connection with Local Exchange Service and Interstate or intrastate Long Distance Message Telecommunications Service, interstate or intrastate 800 Service provided by the Company or another company. If such services are provided by the Company, the charges for the service will be assessed in addition to the rates for RCFA set forth in the Price List.

(6) RCFA service is provided on the condition that the customer subscribe to sufficient facilities to adequately handle calls to the RCFA number without interfering with or impairing any services offered by the Telecommunications Company.

(7) One listing covering the exchange in which the call forwarding Central Office is located is provided without charge. Additional Directory Listings may be obtained in accordance with Local Exchange tariff.

w. Remote Call Forwarding Appearance (RCFA) Concurrent Path – Up to five calls may be forwarded to the forward number simultaneously. In order to enable more than one to be forwarded concurrently, the Remote Call Forwarding Concurrent Path charge will apply for each activated concurrent path in addition to the original RCFA.

x. Reservationless Conference Calling – Allows end users to establish a conference call bridge with individual call-in ports without the need for an operator or a reservation. Service is initiated by a chairperson who establishes the call, and time. The chairperson then passes the call-in number and password to call participants. A help desk will be available 24 hours/day, 7 days/week.

y. Selective Call Acceptance (SCA) – Gives the subscriber control over which call will be accepted. The customer establishes a list of numbers where only a number on the list will ring through normally. Calling numbers not on the list will hear an announcement that the subscriber's number is not accepting calls at this time.

CUSTOM CALLING, CLASS SERVICE, AND ENHANCED CALLING FEATURES

Custom Calling, CLASS Service, and Enhanced Calling Features (cont'd)

B. Descriptions (cont'd)

1. Features (cont'd)

- z. Selective Call Forwarding (SCF) – Routes important calls to an alternate phone number. The customer establishes a list of numbers where, if a calling number is on the list, calls from these numbers will be forwarded to a customer selected number. Only numbers on the list will be forwarded. If the alternate location is not a free call, the customer will be billed for each call forwarded.

This service can work with Call Forward, all calls. Numbers on the customer's preferred list will be routed to the designated SCF number. All other calls will be routed to the regular Call Forward number.

- aa. Selective Call Rejection (SCR) – Blocks unwanted calls from reaching the subscriber. The customer establishes a list of numbers where, if a calling number is on the list, the caller will hear an announcement that the subscriber's number is not accepting calls at this time. All calling numbers not on the list will ring through normally. The subscriber will not be notified of rejected calls.
- bb. Selective Distinctive Ringing (SDR) – A business function which allows the user to program a unique ringing pattern when calls are received from numbers on a customer specified list. The customer is able to change this list from their touch tone phone.
- cc. Speed Calling 8 Numbers (SSC) – Allows customer to place calls to frequently called local or long distance numbers by dialing a one digit code.
- dd. Speed Calling 30 Numbers (LSC) – Allows customer to place calls to frequently called local or long distance numbers by dialing a two digit code. The combination of Speed Call 8 and Speed Call 30 is not available.
- ee. Three-Way Calling (3WC) – Allows the customer to form a three way conference with other telephone numbers. The originating customer must remain on the line to keep the conference established.
- ff. Warm Line (WL) – Provides an automatic connection between a calling station that goes off hook and remains off hook for 30 seconds and a pre-assigned directory number. This allows the line to be used to make outgoing calls to other numbers when desired.

CUSTOM CALLING, CLASS SERVICE, AND ENHANCED CALLING FEATURES

Custom Calling, CLASS Service, and Enhanced Calling Features (cont'd)

B. Descriptions (cont'd)

2. Features (cont'd)

- gg. Privacy Defender – Eliminates Nuisance Calls by Ensuring that all carriers are identifiable.
- hh. Simring – Allows subscriber to specify a list of numbers which are rung (in addition to subscriber's own number) whenever subscribers line is called. Any of the numbers that are rung can answer the call.
- ii. Find Me Follow Me – Allows subscriber to specify a list of numbers that are rung whenever subscriber's line is called, and an order for those numbers. Each number is rung in order (and several numbers can be rung simultaneously) until one of them answers the call, or the list is exhausted.
- jj. Do Not Disturb – Allows subscriber to block their line temporarily to prevent incoming calls.
- kk. Reminder Call - Allows subscriber to schedule reminder calls, either once or at regular intervals (for example daily or weekly).
- ll. Call Hold - Allows subscriber to put a call on hold in order to dial another number, and then switch between the two calls.
- mm. Mandatory Validated Account Codes - Allows long distance calls to require that an account code is entered and validated against configured permitted values.

CUSTOMIZED SERVICES

Customized Services

A. Description

Customized Services of equipment consist of modifications of standard equipment or service arrangements for which provision is not made elsewhere.

B. Regulations

1. Customized Services of equipment will be provided whenever, in the judgment of the Company, there is a valid reason for providing the service requested and it is not detrimental to any other services offered by this Company.
2. Customized Services of equipment will be furnished subject to the provisions of the regulations, rates, and charges specified in this tariff.
3. Customized Services of equipment will be furnished at charges based on the actual cost of furnishing such equipment and arrangements. Monthly rates and one-time charges such as service, nonrecurring and construction charges will apply based on the circumstances in each case. The Company reserves the right to require an initial contract period longer than one (1) month at the same location.
4. The charge to move or change Customized Services of equipment is the same as the charge to install it.

C. Rates and Charges

Rates and charges for Customized Services are developed based on the individual needs and requirements of the customer.

DIGITAL SWITCHED SERVICES

Digital Switched Service (DSS)

A. Description

Digital Switched Service (DSS) provides digital exchange service for customers at a DS-1 level. DSS provides connectivity between the customers premise and the central office through a DSS channel termination (1st Mile and Additional Mile) and a DSS switching charge. Access from the local exchange and toll networks is provided through these circuits as subscribed to by the end user.

B. Conditions

1. DSS is provided subject to the availability of central office facilities.
2. Circuits can be provided at a DS1 level or at a DS-0 level as subscribed to by the customer. DS-0 level service can be provided with or without DID service. DID Numbers will be provided at additional cost as specified elsewhere in this Price Schedule.
3. Each DSS service enables the customer to install up to a maximum of 24 voice grade circuits per DSS facility. Customers choosing the DS-0 level of service will be assessed a multiplexing charge.
4. The minimum service period for DSS is one month.

DIRECT INWARD DIALING (DID) SERVICE

Direct Inward Dialing (DID) Service

- A. Description
1. Direct Inward Dialing Service to customer premises located switching systems is furnished subject to the availability of telephone numbers.
 2. The Service includes the central office switching equipment necessary for direct inward dialing from the exchange and long distance message telecommunications network directly to terminal equipment associated with customer premises located switching systems.
 3. The service must be provided on all lines in a trunk or network access line group arranged for inward service. Routing of calls to selected numbers within the direct inward dialing number group over a separate trunk or network access line group is not contemplated.
 4. Operational characteristics of interfaces signal between the Company-provided connecting arrangements and the customer-provided switching equipment must conform to the rules and regulations the Company considers necessary to maintain proper standards of service.
 5. The Company shall not be responsible to the customer or to the customer's patron if changes in protection criteria or in any of the facilities, operations or procedures of the company render any facilities provided by a customer, or its patrons obsolete or require modification or alteration of such equipment.
 6. Direct-in-dial Trunks may be provided in the quantity determined by the Company to be sufficient for adequate service, only in exchanges where the Central Office is equipped for such service. When otherwise provided, Direct-in-dial Trunks will be furnished at the rates based on cost.
 7. Directory listings will not be provided without charge for numbers issued for DID service. Customers desiring listings for these numbers in the telephone company directory may purchase listings they desire.
 8. The provision of this service requires the customer subscribe to a sufficient number of trunk facilities to adequately handle the volume of incoming calls.

DUAL SERVICES

Dual Service

A. Description

Dual Service provides exchange access line service with the same telephone number simultaneously to two different addresses served from the same wire center. Dual Service is designed to assure the customer continuous service at both locations during the time of a move.

B. Regulations

1. Dual Service is available to those services that are not specially designed or engineered.
2. Dual Service is furnished only in central offices where adequate and suitable facilities are available.
3. Dual Service is available for a maximum of 30 (thirty) days.
4. Dual Service is available on orders for a transfer of service within the same wire center where no telephone number change is involved.
5. Dual Service is not available on multiparty service.

C. Rates and Charges

1. This service is in addition to the basic rates and charges for the service with which it is associated.
2. The monthly rate for Dual Service will be the appropriate portion of the monthly rates for the services provided on both lines during the period of Dual Service.

JOINT USER SERVICE

Joint User Service

- A. Description
1. Business exchange service is normally furnished for the exclusive use of a customer, and/or employees, agents, or representatives. Joint use allows other individuals, firms, or corporation to share the customer's service.
 2. Joint User Service can be associated only with single line business service or PBX trunk services.
 3. The maximum number of joint users allowed in connection with any customer's service is limited to two regardless of the number of lines and/or trunks to which the customer subscribes.
 4. Applications for Joint User Service and for service, equipment or facility charges in connection therewith must be executed by the customer who is responsible for payment of all charges incurred.
 5. Total charges for communications service, allocated by the primary customer among the users, cannot exceed the Company's total charges to the customer.
 6. Joint users of a customer's communication service must have the option of obtaining communications service directly from the company.

MULTI-LINE HUNT SERVICE

Multi-Line Hunt Service

A. Description

Multi-Line Hunt Service is available for Business and Residence Local Exchange Service where more than one line is in service. This service provides hunting over two or more lines in a designated hunt line group when the pilot number line is busy. Hunting is performed only when a pilot number of the hunt group has been dialed/keyed. Sequential or circular hunting for an idle number is performed in the same order each time.

B. Non-Recurring charges as outlined in Section 5 will apply to establish this service.

OFF-PREMISE EXTENSION SERVICE

Off-Premise Extension Service

A. General

1. Off-premise extension circuits are provided to allow the customer the option of extending telephone service from the normal to a second location within the wire center using the company's cable distribution facilities. Off-premises extension circuits are furnished subject to the availability of circuits and provided when no unusual expense is involved.
2. Continuous Property Extensions, where the extension comes from the main line termination and where the extension is located in a different building on the same continuous property as the main access line termination, may be installed by the Company. The installation charge will be negotiated between the subscriber and the Company. The subscriber is responsible for the maintenance of this subscriber owned wiring. No recurring monthly charge will apply in this situation.
3. Continuous property extensions requiring an additional network interface are defined as those where the drop to the additional access point comes out of the distribution cable and requires an additional network interface.
4. Multiring/Multilocation Service - Allows for the same number to be called at multiple locations on non-continuous property. The monthly charge will apply to each additional location that the customer requests. For this service, the customer subscribes to an additional local service at each location but the customer's primary name and number will appear on caller ID for outgoing calls. Long distance charges will apply to each location if desired by the customer. The customer's primary location address will be the address transmitted to emergency services if 911 is called from the other location(s).

C. Simple Solutions

1. General Description & Conditions

Simple Solutions (in this section, “the Plan”) refers to a bundled service offering by the Company. For residential customers of basic local exchange service, such customers can obtain, for a flat rate of \$5 per month, five calling features - Caller ID, Call Waiting, 3-Way Calling, Call Forwarding, and Voice Mail. If the residential customer simultaneously subscribes to the local service portion of the Plan, then the subscriber can obtain unlimited long distance service for an additional flat rate of \$34 per month. If the customer simultaneously subscribes to basic local service, the subscriber can obtain any available Residential DSL service for the regular monthly rate, less a percentage discount, based on length of term agreed to. Available discounts to the regular DSL rate are 10% for a 1 year term. If the Customer simultaneously subscribes to the local service AND the broadband service portions of the Plan, the Customer can obtain a tablet bundle for an additional flat rate of \$25 per month. The Customer is not required to simultaneously subscribe to the long distance portion of the Plan to obtain the DSL portion of the Plan and vice versa. The residential subscriber is not required to simultaneously subscribe to the long distance portion of the Plan to obtain the DSL portion of the Plan and vice versa. A residential subscriber can subscribe to all three portions of the Plan and obtain the package rates listed above.

2. Conditions

The following conditions apply to Simple Solutions:

- The Plan is available to residential customers only.
- Services are not available in all areas.
- Prices exclude taxes, surcharges and other fees.
- The Plan is Subject to the terms and conditions for the individual service components of the Plan as set forth in this price schedule, Dubois’ Local Exchange Tariff (PSC Wyo. No. 3), and applicable DSL service documents.
- Internet connection speeds may vary due to Web sites accessed, customer location, internet congestion or customer equipment.
- Altering, suspending or disconnecting service may cancel price guarantee and may result in an early termination fee.

3. Early Termination Fee

The Simple Solutions Plan is subject to a one-year service agreement. If the Customer cancels the Plan prior to the expiration of the one-year service agreement, the Customer will be assessed an early termination fee equal to 1/12 of the \$100 early termination fee for each full month remaining in the unsatisfied agreement period. New DSL subscribers will be subject to applicable early termination fees as defined in NECA Tariff 5. Total early termination charges not to exceed \$185. However, if the Customer cancels the Plan and has the tablet bundle portion of the Plan, the Customer will be assessed an early termination fee equal to 1/12 of the \$485 early termination fee for each full month remaining in the unsatisfied agreement period (includes \$300 early termination fee to cover the cost for the tablet).

PACKAGE OPTIONS

Package Options

D. Simple Solutions for Business

1. General Description and Conditions

Simple Solutions for Business refers to a bundled service offering by Dubois Telephone Exchange. When a business customer subscribes to basic local business service, that business subscriber can obtain any combination of the following basic features for a flat rate, which will be defined by length of term - Caller ID, Call Waiting, Call Waiting Identification, 3-Way Calling, Call Forwarding, Call Forward Selective, Call Forward Busy, Call Forward No Answer, Call Forward Remote Access, Trunk Hunt, Voice Mail, Anonymous Call Rejection, Automatic Recall, Automatic Callback, Distinctive Ring and Speed Calling Short List. Monthly flat rates for any combination of these features are defined as follows: \$10 on a 1 year term, \$8 on a 2 year term and \$5 on a 3 year term. If the business subscriber simultaneously subscribes to basic local service, then the subscriber can obtain any available DSL service for the regular monthly rate, less a percentage discount, based on length of term agreed to. Available discounts to the regular DSL rate are 5% for a 1 year term, 10% for a 2 year term and 15% for a 3 year term. The business subscriber is not required to simultaneously subscribe to the calling feature portion of the Plan to obtain the DSL discount in the Plan and vice versa. Though the business customer is not required to subscribe to both calling features and DSL, if both are chosen, the agreed upon term must be the same for both features and DSL discount.

2. Conditions

The following conditions apply to Simple Solutions for Business:

- The Plan is available to business customers only.
- Services are not available in all areas.
- Prices exclude taxes, surcharges and other fees
- The Plan is subject to the terms and conditions for the individual service components of the Plan as set forth in the price schedule, DTE's Local Exchange Tariff, and applicable DSL service documents.
- Internet connection speeds may vary due to Websites accessed, customer location, internet congestion or customer equipment.
- Altering, suspending or disconnecting service may cancel price guarantee and may result in an early termination fee.

3. Early Termination Fee

The Simple Solutions for Business Plan is subject to a one, two or three year service agreement. If the Customer cancels the Plan prior to the expiration of the service agreement, the Customer will be assessed an early termination fee equal to 1/12, 1/24, or 1/36 (depending on term) of the \$185 early termination fee for each full month remaining in the unsatisfied agreement period.

PAYPHONE SERVICE

Payphone Service

A. General Regulations

1. Payphone Service includes lines to which, coinless, card reader or a combination of card reader telephones may be attached.
2. Payphone Service is a two-way or, optionally, one-way originating only business exchange access line composed of the serving central office line equipment, all outside plant facilities needed to connect the serving central office with the customer's premises, and the Network Interface Device at the demarcation point. These facilities are Company-provided and maintained and provide access to and from the telecommunications network for long distance service and local calling.
3. Selective Class of Call Screening will be provided where such facilities are available at the customer's option. Selective Class of Call Screening treatment enables the customer to restrict outgoing operator-handled calls, placed over the Telephone Company's network, from the service point to only those calls which are charged to a called telephone, a third number or a calling card.
4. In the case of one-way service, intercept treatment will be provided.
5. A maximum of one customer-provided instrument implemented pay telephone may be connected to any one instrument or CO implemented line.
6. General Rules and Regulations found in other sections of this tariff are applicable to the provision of Payphone Service.
7. Directory listings may be provided under the regulations governing the furnishing of listings for business subscribers.
8. A Network Interface Device will be installed at a location determined by the Company which is accessible to the customer. The Network Interface Device is a company-provided jack or its equivalent. It is the point of connection between the telephone company owned wiring and wiring owned by the Customer.
9. One directory will be distributed without charge for each payphone business exchange line.
10. Installation Charges and the appropriate Network Interface Device (NID) material charge are applicable for the installation, move or rearrangement of the NID on the customer's premises to establish or reestablish network access.

DUBOIS TELEPHONE EXCHANGE, INC.

Price Schedule

Wyoming

Issued: September 17, 2007

Original Sheet No. 2.24

PAYPHONE SERVICE

Payphone Service (cont'd)

A. General Regulations (cont'd)

11. Installation Charges and the appropriate NID material charge apply when a premises visit is made for the sole purpose of installing a customer requested NID.
12. The limit of the Company's liability for end user fraud of whatever nature occurring at or in association with the subscriber's equipment shall be governed by provisions of this Tariff and rule or regulations of the Wyoming Public Service Commission. In case of conflict between the tariff provisions and Commission rules and regulations, the rule or regulations.
13. Off-Premise Extensions to a payphone service provider are not permitted.
14. Toll Messages are charged for at the established toll rates of the carrier providing the toll call.
15. The Multiline business Subscriber Line Charge, found in the interstate access tariff, is applicable to all payphone lines.

B. Responsibility of the Customer

1. The customer shall be responsible for the installation, operation and maintenance of the customer-provided instrument, plus all ancillary equipment, such as booths, shelves, lighting, directories, etc., used in connection with this service. The customer is responsible to comply with the requirements set forth in the American With Disabilities Act of 1990.
2. The customer shall be responsible for the payment of charges for all local and toll messages originating from or accepted at this type of service, including any Directory Assistance Calls.
3. The customer-provided instrument must be registered in compliance with Part 68 of the FCC's Registration Program or connected behind an FCC-registered coupler and have the following operational characteristics:
 - a. Must be able to access the operator at no charge.
 - b. Must be able to access Directory Assistance.
 - c. Must be able to complete local and toll calls.
 - d. Must comply with all applicable federal, state and local laws and regulations concerning the use of this type of telephone by disabled and/or hearing impaired persons.
 - e. Must be able to access 911 emergency service, where available, at no charge.
 - f. Must be able to access toll free and 800/888 Service at no charge.

PAYPHONE SERVICE

Payphone Service (cont'd)

- B. Responsibility of the Customer (cont'd)
 - 3. (cont'd)
 - g. Must allow any End User to reach their preferred Long Distance Carrier by dialing the appropriate Long Distance Carrier Access Code. These codes must conform to the industry standard formats of 10XXX and 101XXXX.
 - 4. Each customer must provide instructions, attached or in close proximity to the set, for use including specific instructions for the above requirements; refunds and complaints; one-way calling if so equipped; long distance access; and must prominently display notice in close proximity to the set that the Instrument Implemented phone is not a Company Telephone. Said instructions shall also show the telephone set's working number and include a local or toll free number to allow the public to directly contact the private pay phone owner.
 - 5. Customers who elect not to subscribe to Selective Class of Call Screening will be fully responsible for all calls billed to customer's exchange access line. The Telephone Company shall have no responsibility to adjust any such charges and/or release customer from paying any such charges. Customer will hold the Telephone Company harmless from and against any liability or loss resulting from all calls billed to customer's exchange access line.
 - 6. The customer must comply with the Wyoming Public Service Commission's Rules and Regulations regarding the use of customer-provided pay telephones.
 - 7. Any federal, state, or local taxes on the Customer Owned Pay Telephone or calls made from that phone are the responsibility of the customer.
 - 8. The customer shall not program or cause to be programmed any such telephone used in connection with this service to limit the duration of a local message.
 - 9. The customer shall be responsible for obtaining a certificate of public convenience and necessity to provide Payphone Service and for providing proof of said authority prior to installation of service.

PAYPHONE SERVICE

Payphone Service (cont'd)

C. Violation of Regulations

1. Where any customer-owned pay telephone is in violation of this Tariff, the Company will notify the customer in writing of the violation.
2. The customer shall discontinue use of the customer-owned pay telephone or correct the violation and notify the Company in writing within five (5) days after receipt of such notice that the violation has been corrected.
3. Failure of the customer to discontinue such use or to correct the violation will result in the suspension of the customer service until such time as the customer complies with the provisions of this Tariff.

D. Instrument Implemented Payphone Service

Instrument Implemented Payphone Service is offered for use with a customer provided pay telephone. All attachments of a customer provided instrument to the network must be made pursuant to the rules and regulations set forth in this Tariff and as required by State and Federal commissions.

E. Features and Functions

1. Answer Supervision provides signaling on the line notifying the line that the called party has answered.
2. Special Number Assignment is a specific number requested by the customer. This service is available where facilities are accessible and it is technical feasible to provide.
3. A "local message" from Customer Provided Payphone Service served by a given exchange, is a completed local call originating at such service and terminating at any service which may be called without a toll charge.
4. Installation Charges, as specified in Section 5 of the Company's Exchange Tariff, apply in addition to other charges specified for Instrument Implemented Payphone Service.
5. Where Custom Calling Service is desired, the charges as specified in this Price Schedule are applicable for Instrument Implemented Payphone Service.

**PRIMARY RATE INTERFACE (PRI)
INTEGRATED SERVICES DIGITAL NETWORK (ISDN)**

Primary Rate Interface (PRI) – Integrated Services Digital Network (ISDN)

A General Description

1. Integrated Services Digital Network (ISDN) is a public network-based set of communications services that make it possible to send, receive, and modify information using regular telephone facilities. ISDN provides end-to-end digital communications and gives the ability to transmit data and voice over the same telephone line simultaneously. This functionality is provided via channelized transport facilities. The ISDN architecture provides for Primary Rate Interface (PRI) which is typically used when a customer wants to connect large quantities of digital line to the network.
2. Integrated Services Digital Network-Primary Rate Interface (ISDN-PRI) uses the ISDN architecture to provide the customer with the capability to transmit voice and data simultaneously over the same digital facility. Under various optional arrangements, ISDN-PRI provides the customer with access to Circuit-Switched Voice Services and Circuit-Switched Data Services.

B. ISDN-PRI SERVICE ARRANGEMENT

1. ISDN-PRI Service Arrangement Connections – An ISDN-PRI arrangement connects an ISDN-capable Company central office switch to ISDN-capable customer premise equipment (CPE). Depending on the application, that CPE might be a PBX, a router, a multiplexer, etc. The ISDN-PRI arrangement provides a total of twenty-four digital communications channels within a single physical facility. Twenty-three of these channels are called Bearer, or B Channels and they carry the actual voice or data. Another channel, called the Delta or D Channel, is used to transport signaling for the other 23 channels. This configuration is known as 23B+D.
 - a. B Channel – The B Channel is a bi-directional synchronous channel capable of supporting digital transmission speeds of 64 kilobits per second (kbps). Each B Channel of an ISDN-PPRI may carry:
 1. Circuit-Switched Voice
 2. Circuit-Switched Data

**PRIMARY RATE INTERFACE (PRI)
INTEGRATED SERVICES DIGITAL NETWORK (ISDN)**

Primary Rate Interface (PRI) – Integrated Services Digital Network (ISDN) (cont'd)

- B. ISDN-PRI SERVICE ARRANGEMENT (cont'd)
1. ISDN-PRI Service Arrangement Connections (cont'd)
 - b. D Channel – The D Channel is a 64 kbps digital signaling channel that carries signaling and control for the B Channels.
 2. ISDN-PRI Access Facility – The ISDN-PRI Access Facility provides a high capacity digital link over which the ISDN-PRI services are delivered. This facility is based on a 1.544 million bits per second (Mbps) DS1 carrier (T1 facility) connecting the customer's premises to the Company central office serving the customer's premises.
 3. Customer Premises Location – For provision by the Company of ISDN-PRI service, the customer's premises must be located in the Company's local service area.
 4. Multiple ISDN-PRI Arrangement – There may be situations where more than 23 B Channels are needed at a particular customer premise. In those situations multiple ISDN-PRI facilities can be assigned to an ISDN-PRI arrangement. With the multiple ISDN-PRI arrangement, the D Channel is the first ISDN-PRI facility is used to transport signaling for additional PRI facilities. The first ISDN-PRI would be configured as 24B. This use of Non-Facility Associated Signaling (NFAS) allows the overhead of the D Channel to be distributed over multiple ISDN-PRI facilities, thereby increasing channel efficiency.
 5. D Channel Backup – In Multiple ISDN-PRI Arrangement, a second D Channel can be assigned (where available) as an automatic backup to the primary D Channel. This can be offered when more than one ISDN-PRI is provided to the same customer in order to provide redundancy of the signaling channel.
 6. Fractional T-1 Service – Fractional T -1 is an unchannelized DS-1 at intermediate Bit rates, increments of either 56 Kbps or 64 Kbps, can be tailored to meet individual customer requirements. The Fractional T-1 combines a series of individual channels in a T-1 circuit and can be used as a single channel between 56 kbps and 1/533 mbps speed. Allows wider band channels than the typical 56 kbps channel, providing the customer exactly the band's width it needs without having to rent a whole T-1.

Primary Rate Interface (PRI) – Integrated Services Digital Network (ISDN) (cont'd)

B. ISDN-PRI SERVICE ARRANGEMENT (cont'd)

6. Fractional T-1 Service (cont'd)

- a. The Company offers 11B channels and 1 D channel in the Fractional T-1 offering.
- b. The company will not be compelled to provide the transmission facilities for Fractional T-1 in those areas where the facilities do not comply with the parameters required to provide the service.

C. CIRCUIT SWITCHED SERVICE DESCRIPTIONS

Circuit Switching is a switching arrangement in which an entire circuit or B Channel is dedicated to a given call. The circuit is connected on a per call basis and can carry circuit-switched voice or circuit-switched data. Circuit switched related services include:

1. Clear Channel Capability – A characteristic of the transmission paths on the “B” channel that allows the full bandwidth on the “B” channel, 65 kbps, to be available to the customer. However, ISDN interconnection to non-ISDN equipped central offices will be potentially subjected to analog transmission or sub-rated to 56 kbps.
2. Dedicated Trunk Groups – The B Channels of an ISDN-PRI can be dedicated for calls to and from the public network: Incoming, Outgoing, 2-way, Direct Outward Dialing (DOD) or Direct Inward Dialing (DID).
3. Number Assignment – Assignment of numbers related to ISDN-PRI service shall be limited to numbers assigned to the Company local service exchange for the Company central office in which the Customer premises is located.
 - a. Individual Directory Number – Each ISDN-PRI arrangement includes an individual directory number.
 - b. Multiple Directory Numbers – Additional directory numbers, a range of directory numbers, or several ranges of directory numbers can be optionally added.

**PRIMARY RATE INTERFACE (PRI)
INTEGRATED SERVICES DIGITAL NETWORK (ISDN)**

Primary Rate Interface (PRI) – Integrated Services Digital Network (ISDN) (cont'd)

C. CIRCUIT SWITCHED SERVICE DESCRIPTIONS (cont'd)

4. Hunt Service – Hunt Service is included in the ISDN-PRI Service Arrangement Connection. This feature allows incoming calls to a busy directory number to search through a predetermined list of directory numbers. This may be another directory number assigned to the customer for the ISDN-PRI Service Arrangement on the same (or a different) B Channel.
 - a. Sequential Hunt – Provides the most efficient hunting sequence available, plus allows for much larger trunk groups than the standard ISDN-PRI packages. With sequential hunt, an incoming call is completed to the next available trunk (bearer) in sequence starting from the last trunk selected. This can occur across multiple PRI facilities. The feature can support up to 220 Primary Rate Interfaces in a single hunting configuration. The standard limit is 50.
5. Advanced Calling Services – ISDN-PRI can support access to the following Advanced Calling Services (also called CLASS services) from suitably equipped CPE:
 - a. Caller ID – Basic – This feature allows the central office and the customer's equipment to communicate the calling party's directory number on calls carried by the ISDN-PRI service. The number can then be made available to be displayed on a properly equipped telephone set or adjunct equipment.

D. TECHNICAL SPECIFICATION

1. Transmission Specifications – The ISDN-PRI Access Facility provides a high capacity digital link over which the ISDN-PRI services are delivered. This facility is based on a 1.544 Mbps DS1 carrier (T1 facility) whose characteristics are as follows:
 - Line Code = Bipolar 8 Zero Substitution (B8ZS)
 - Framing Format = Extended Super Frame (ESF)
 - Signaling = Q.931 Signaling
 - Data Rate = 64 kbps clear or kbps restricted
 - D Channel = 24th channel on the T1 facility

Primary Rate Interface (PRI) – Integrated Services Digital Network (ISDN) (cont'd)

D. TECHNICAL SPECIFICATION (cont'd)

2. Customer Premise Equipment (CPE) and Facilities – Customer Premises Equipment (CPE) that is compatible with the Company's ISDN-PRI interface is the responsibility of the customer.

The Company shall not be responsible if changes in any of the equipment, operations, or procedures of the Company utilized in the provisioning of ISDN services render any facilities provided by the customer obsolete or require modification of such equipment or system, or otherwise affect its use or performance.

E. REGULATIONS AND CONDITIONS

1. Unless specifically exempted, ISDN services shall be subject to all general regulations applicable to the provision of service by the Company as stated in the General Regulations at Section 3 of this tariff.

Upgrade to Full ISDN-PRI from Fractional T-1 can take place at any time. The customer will submit a request and the upgrade will be billed at the new rate effective to the date of the change.

2. ISDN-PRI is provided at the option of the Company. These services are furnished subject to central office switching capacity, capability, and the availability of outside plant facilities.

The availability, functionality, and capabilities of ISDN-PRI may vary, or may not be available, dependent upon type of serving central office switch, related software controlling that switch and associated outside plant.

- a. Where facilities are not available, or unusual expenditure are involved in making them available, the customer may be required to pay additional charges to cover the unusual expenditure, or to contract for services beyond the normal service term, or both.
- b. Mileage Charges: Provision of the underlying ISDN-PRI Access facility (T1) is mileage sensitive. As such, additional mileage charges may apply.

**PRIMARY RATE INTERFACE (PRI)
INTEGRATED SERVICES DIGITAL NETWORK (ISDN)**

Primary Rate Interface (PRI) – Integrated Services Digital Network (ISDN) (cont'd)

E. REGULATIONS AND CONDITIONS (cont'd)

3. Payment for Service:

- a. The minimum charge period for services provided under this Price Schedule is one year.
- b. Customer's have the option to qualify for term discounts by committing under contract to either a three-year or five-year term. The discounts for three-year or five-year term commitment contracts are established at Section 8 following. The discounts for the respective contract period apply to the monthly rates for ISDN-PRI Service Arrangement Connections. The discounts do not apply to any other rates. The discount for the applicable contract period will continue to apply after completion of the contract period unless the customer orders service under a longer contract period in which case rates will be reduced pursuant to the higher discount rate. Notwithstanding execution of a contract by the Company and the customer for purposes of term commitment and qualification for discount, all of the terms, conditions and rates established in this Price Schedule shall apply to provision of ISDN-PRI Services to the customer by the Company.
- c. Suspension of service is not allowed.

4. Termination Liability:

a. Service Ordered on a Month-to-Month Basis

For ISDN-PRI service ordered on a month-to-monthly basis, if the customer disconnects ISDN-PRI service prior to completion of the minimum charge period of one year, the customer shall pay a charge equal to the undiscounted ISDN-PRI monthly rate applicable to the service ordered by the customer multiplied by the number of months remaining in the minimum charge period at the time of disconnection. For service ordered on a month-to-month basis, after completion of the minimum charge period, there is no penalty for disconnection.

**PRIMARY RATE INTERFACE (PRI)
INTEGRATED SERVICES DIGITAL NETWORK (ISDN)**

Primary Rate Interface (PRI) – Integrated Services Digital Network (ISDN) (cont'd)

E. REGULATIONS AND CONDITIONS (cont'd)

4. Termination Liability (cont'd)

b. Service Ordered under a Three-Year Contract

For ISDN-PRI service ordered on a three-year contract, if the customer disconnects the ISDN-PRI services, in whole or in part, before completion of the first year of the contract period, the customer shall pay a charge equal to the ISDN-PRI undiscounted monthly rate applicable to the service ordered by the customer multiplied by the number of months remaining in the first year of the contract period in plus the difference between the applicable three-year contract recurring rate and the applicable undiscounted monthly recurring rate multiplied by the number of months of the contract period that have elapsed as of the date of the disconnection.

Customers under a three-year contract who disconnect ISDN-PRI service, in whole or in part, after completion of the first year of the contract period by before expiration of the contract period, shall pay to the Company an early termination liability charge for each disconnected service equal to the difference between the applicable three-year contract recurring rate and the applicable undiscounted monthly recurring rate multiplied by the number of months of the contract period that have elapsed as of the date of disconnection. For service ordered under a three-year contract, after completion of the three-year contract period, there is no penalty for disconnection.

c. Service Ordered under a Five-Year Contract

For ISDN-PRI service ordered on a five-year contract, if the customer disconnects the ISDN-PRI service, in whole or in part, before completion of the first year of the contract period, the customer shall pay a charge equal to the ISDN-PRI undiscounted monthly rate applicable to the service ordered by the customer multiplied by the number of months remaining in the first year of the contract period plus the difference between the applicable five-year contract recurring rate and the applicable undiscounted monthly recurring rate multiplied by the number of months of the contract period that have elapsed as of the date of the disconnect.

**PRIMARY RATE INTERFACE (PRI)
INTEGRATED SERVICES DIGITAL NETWORK (ISDN)**

Primary Rate Interface (PRI) – Integrated Services Digital Network (ISDN) (cont'd)

E. REGULATIONS AND CONDITIONS (cont'd)

4. Termination Liability (cont'd)

c. Service Ordered under a Five-Year Contract (cont'd)

Customers under a five-year contract who disconnect ISDN-PRI services, in whole or in part, after completion of the first year of the contract period but prior to completion of the third year of the contract period, shall pay to the Company an early termination liability charge for each disconnected service equal to the difference between the applicable five-year contract recurring rate and applicable undiscounted monthly recurring rate multiplied by the number of months of the contract period that have elapsed as of the date of disconnection. Customers under a five-year contract who disconnect ISDN-PRI services, in whole or in part, after completion of the first three years of the contract period but prior to completion of the fifth year of the contract period, shall pay to the Company an early termination liability charge for each disconnected service equal to the difference between the applicable five-year contract rate multiplied by the number of months of contract period that have lapsed as of the date of disconnection. For service ordered under a five-year contract, after completion of the five-year contract period, there is no penalty for disconnection.

d. Waiver of Termination Liability Charges for Customers Ordering New Service Offerings

In the event the Company offers a new service based on new or revised technology that, in the sole judgment of the Company, meets the switched-digital communication capabilities currently provided by ISDN-PRI, the Company will waive Termination Liability for a customer who terminates ISDN-PRI Service in conjunction with ordering the new service offering under this Price Schedule. In order to qualify for waiver of the Termination Liability, the customer must order capacity with respect to the new service offering that is, in the sole judgment of the Company, comparable to that covered by the ISDN-PRI term commitment contract.

**PRIMARY RATE INTERFACE (PRI)
INTEGRATED SERVICES DIGITAL NETWORK (ISDN)**

Primary Rate Interface (PRI) – Integrated Services Digital Network (ISDN) (cont'd)

E. REGULATIONS AND CONDITIONS (cont'd)

5. Directory Listings: One directory listing is provided without charge for each ISDN-PRI customer. Additional listings may be provided as specified for Additional Listing Service in the Rates & Charges section of this ISDN-PRI tariff.
6. Billable Call Treatment: Normal toll charges (including InWATS and OutWATS charges) shall apply to calls that are made outside of the Local Service Area.
7. Customer Premise Equipment (CPE):
 - a. This tariff does not include terminal equipment on the customer's premises. Terminal equipment may be sold or leased separately by the Company (under a separate contract) or may be provided by the customer.
 - b. The customer is responsible for providing the power required for any and all CPE connected to an ISDN-PRI.
8. The Company shall not be liable for any loss or damages arising out of error, interruptions, defects, failure, or malfunctions of ISDN services or associated equipment. Damages arising out of such interruptions, defects, failures, or malfunctions of the services after the Company has been notified, and has reasonable time for repair, shall in no event exceed an amount equivalent to the charges made for the service affected for the period following notice from the customer until service is restored.
9. Federal Common Line Charges: ISDN-PRI service is subject to Federal Communications Commission (FCC) Interstate Common Line charges under the rates and application rules specified by the FCC. These charges are in addition to the charges for ISDN-PRI service specified in Section 8 of this tariff following. Interstate Common Line charges applicable to ISDN-PRI service provided by the Company are billed by the Company pursuant to National Exchange Carrier Association (NECA) Tariff F.D.D. No. 5. The Company is an issuing carrier for NECA Tariff F.C.D. No. 5.

**PRIMARY RATE INTERFACE (PRI)
INTEGRATED SERVICES DIGITAL NETWORK (ISDN)**

Primary Rate Interface (PRI) – Integrated Services Digital Network (ISDN) (cont'd)

E. REGULATIONS AND CONDITIONS (cont'd)

9. Federal Common Line Charges (cont'd)

Applicable ISDN-PRI charges billed by the Company pursuant to NECA Tariff F.C.C. No. 5 include the following:

- a. End User Common Line (EUCL) Pursuant to NECA Tariff F.C.C. No. 5, Section 4.6.8, the End User Common Line (ECUL) – Multiline Business rate will be billed for each ISDN-PRI arrangement provided by the Company at the rate of five EUCL-Multiline Business Individual line or trunk charges as set forth in NECA Tariff F.C.C. No.5., Section 17.2.2(C).
- b. ISDN-PRI Line Port Charge Pursuant to NECA Tariff F.C.C. No. 5, Section 3.10, the ISDN PRI Line Port charge will be billed for each ISDN-PRI arrangement provided by the Company at the rate set forth in NECA Tariff F.C.C. No. 5., Section 17.1.4.
- c. Federal Universal Service Charge (FUSC) Pursuant to NECA Tariff F.C.C. No. 5, Section 3.9, the Federal Universal Service Charge (FUSC) will be billed for each ISDN-PRI arrangement provided by the Company at the rate set forth in NECA Tariff F.C.C. No. 5., Section 17.1.3(B).

The Company will bill the current NECA Tariff F.C.C. No 5 rates applicable to ISDN-PRI service. In the event NECA revises any of the rates applicable to ISDN-PRI service pursuant to NECA Tariff F.C.C. No. 5, the revised rates apply to the ISDN-PRI service provided by the Company to the customer based on the effective date of the change in NECA Tariff F.C.C. No. 5. In the event NECA revises the terms and conditions in NECA Tariff F.C.C. No. 5 applicable to ISDN-PRI service, including any revisions of section numbers reference herein, the revised terms and conditions and/or section numbers shall apply to charges under NECA Tariff F.C.C. No. 5 billed by the Company to customers applicable to ISDN-PRI service provided by the Company notwithstanding any references in this section made obsolete by revision in NECA Tariff F.C.C. No. 5.

PRIVATE BRANCH EXCHANGE (PBX) SERVICE

Private Branch Exchange (PBX) Service

A switching system that provides internal telephone communication between lines located on a customer's premises, or the customer's off-premises location, as well as connection to the telecommunication network.

Private Branch Exchange (PBX) Trunks

A. Description

1. PBX Service is not provided on a one-way basis. Therefore, in-only, out-only, or two-way trunks must be used in combinations which provide for two-way service for the PBX system.
2. Non-recurring charges as found in Section 5 of the Company's Exchange Tariff will apply.

**PROTECTION SERVICE FOR
HIGH VOLTAGE ENVIRONMENTS**

Protection Service for High Voltage Environments

A. Description

1. Company services provided on facilities that extend to a high voltage environment, i.e., electric power generating, switching and distributing locations, require high voltage protection whenever hazardous voltages of 1000V peak-asymmetrical or greater appear on those facilities due to Ground Potential Rise (GPR) and/or induction caused by faults in electric power system(s) located in the customer's premises. The high voltage protection may be provided by the Company, as specified herein, or the customer may elect to provide the high voltage protection. The high voltage protection is designated to isolate or neutralize the hazardous voltages. The protection objectives on Company services and facilities at these locations are as follows:
 - a. To minimize electrical hazards to personnel engaged in construction, operation, maintenance and use of telecommunications services.
 - b. To limit electrical damage to telecommunications equipment, cable and wire facilities.
 - c. To provide the required service continuity and integrity of telecommunications transmission as specified by the customer.
2. This offering requires high voltage protection at the customer's premises and if necessary, at the Company CO whenever the fault-produced GPR/induction equals or exceeds 1000V peak-asymmetrical.

B. Responsibility of the Customer

1. A customer whose services are provided on facilities that extend to a high voltage environment where high voltage protection is required, as set forth in A. preceding, shall be responsible for providing to the Company a completed Form RG 31-0048, "Design Information for Power Industry Channels," which includes the following:
 - a. The maximum return (line fault) current under worst-case, single-phase fault conditions at each location where telecommunications services are requested.
 - b. The type, quantity and projected forecast of each service required at a given location, including those required by contractors or any other temporary service needs, in accordance with the definitions given in D., following.

Effective: October 29, 2007

**PROTECTION SERVICE FOR
HIGH VOLTAGE ENVIRONMENTS**

Protection Service for High Voltage Environments (cont'd)

B. Responsibility of the Customer (cont'd)

1. (cont'd)

c. The Service Performance Objective Classification for each service in accordance with the definitions in E., following.

d. The technical data needed by the Company to determine the method of protection required at each service location. This data includes, but is not limited to, the ground grid area, impedance of the station ground grid to remote earth, X/R ration of the power system at the probable point of fault, fault current diagrams and maps of major power feeder routes.

2. Changes in the information provided in 1., preceding, will require written notification, with a revised Form RG 31-0048. These changes shall be provided as they occur to permit reevaluation, redesign, implementation and tests of the required modified or new protection method

C. Responsibility of the Company

1. The Company, working in conjunction with the customer, shall determine the proper methods of protection required to achieve the objectives set forth in A. The method of protection for every service in a cable shall be coordinated by the Company to be compatible with the protection provided for the most critically important service in that cable.

2. It is expressly declared that metallic facilities are in continually decreasing supply, and the Company is not obligated to continue to make such facilities available. Metallic facilities are offered only where existing facilities and operating conditions permit.

3. The Company reserves the right to treat high voltage protection on an individual case basis, dependent on the type of facilities available.

DUBOIS TELEPHONE EXCHANGE, INC.

Price Schedule

Wyoming

Issued: September 17, 2007

Original Sheet No. 2.40

Effective: October 29, 2007

**PROTECTION SERVICE FOR
HIGH VOLTAGE ENVIRONMENTS**

Protection Service for High Voltage Environments (cont'd)

D. Protection Service Types

Protection services which the Company offers are identified according to the following types:

Type 1 – Services requiring either DC transmission or DC and DC transmission, used for basic exchange telephone service and/or Private Line Transport Service

Type 2 – Private Line Transport Service requiring Voice Grade and/or Low Speed Data, D.C. Channel and Alarm transmission, used for pilot wire protective relaying or DC tripping

Type 3 – Private Line Transport Service requiring AC Voice Grade transmission only, used for telemetering, supervisory control, data, etc.

Type 4 – Private Line Transport Service requiring AC Voice Grade transmission only, used for audio tone protective relaying.

E. Service Performance Objective Classification

1. Interruptions or outages of telecommunications circuits serving electric power substations may occur for physical reasons such as cable damage due to extraordinarily heavy storm loading, a vehicle striking and breaking a utility pole, a cable cut, a lightning strike, or acts of God. Circuit failures caused by such events cannot be prevented and the Company expressly states that provision of the service provided in this section cannot preclude such service outages as may occur due to the above-mentioned circumstances.
2. Interruptions or outages due to the effect (GPR and/or induction) of faults in the customer's power generating, transmission and/or distribution systems are minimized through the installation and maintenance of high voltage protection service which is designed to operate in a fault-produced electrical environment.

DUBOIS TELEPHONE EXCHANGE, INC.

Price Schedule

Issued: September 17, 2007

Original Sheet No. 2.41

Effective: October 29, 2007

**PROTECTION SERVICE FOR
HIGH VOLTAGE ENVIRONMENTS**

Protection Service for High Voltage Environments (cont'd)

E. Service Performance Objective Classification (cont'd)

3. Because of the customer's need for service continuity during power system faults on some types of telecommunications services provided to power stations, the following system of Service Performance Objective Classifications has been established for the purpose of permitting the customer to specify the performance objectives for most types of telecommunications services provided to power stations:

Class A – Non-interruptible service performance (must function before, during and after the power fault condition) for services requiring ac transmission only. Class A service cannot tolerate even a momentary service interruption. Non-tolerable service interruptions include both loss of dependability (failure to deliver a valid trip or control signal) and loss of security (delivery of a false trip or control signal).

Class B – Self-restoring interruptible service performance (must function before and after the power fault condition) for any service. Class B service can tolerate a service interruption for the duration of a power system fault, but service continuity must be restored immediately after the fault without requiring any repair personnel activity.

Class C – Interruption service performance (can tolerate a station visit to restore service) for power stations with a GPR less than 1000V peak-asymmetrical. Class C service can tolerate a service interruption which requires a station visit by repair personnel to restore service. Class C service cannot be provided in conjunction with Class A or Class B service.

F. Provision of High Voltage Protection Service

1. The Company or the customer may provide the high voltage protection.
2. At the customer's request, the Company shall provide any required high voltage protection at the customer's premises and, if necessary, at the Company's CO at rates and charges set forth in G., following. The Company will inspect and verify the protection when service is established at new or existing customer locations and at future times as deemed necessary during changes, rearrangement or maintenance.

**PROTECTION SERVICE FOR
HIGH VOLTAGE ENVIRONMENTS**

Protection Service for High Voltage Environments (cont'd)

- F. Provision of High Voltage Protection Service (cont'd)
3. If the customer elects to provide the required high voltage protection, the equipment used must meet the technical requirements specified in the Institute of Electrical and Electronics Engineers (IEEE) Standard 487.
 4. Where the Company does not provide the high voltage protection (HVP) on the customer's facilities because the customer has elected to select, install, use and maintain its own HVP, the customer does so with the understanding that it is solely responsible for any interruption of Company service associated with its selection, installation, use or maintenance of the HVP. Furthermore, the customer, its successors and assigns, agree to indemnify and hold the Company and its Subsidiaries and its and their employees, officers, directors and agents harmless from all loss, liabilities, costs and expenses, including attorneys' fees and all cost of defense and settlement, resulting from interruption of service, damage to Company property, claims, demands, suits or actions of any nature whatsoever ("Proceedings"), arising from the failure of the HVP selected, installed, used or maintained by the customer.
 5. The Company reserves the right to suspend any service without adequate high voltage protection until adequate protection is provided.

SERVICE RESTRICTIONS

700, 976, 900 Service Access Restriction

A. General

Service Access Restriction for 700, 976, and/or 900 service, is a central office service furnished to customers upon request, which allows for access restrictions to be placed on the customer's local exchange telephone service line so that calls to telephone numbers preceded by the 700, 976, and/or 900 NPA will not be completed. When the NPA telephone number is dialed, the call will be diverted to a Company-provided intercept announcement.

B. Conditions

Service Access Restriction for 700, 976 and/or 900 service enables the customer to prohibit the dialing of calls to 1+700-XXX-XXXX, 1+NPA+976-XXXX and/or 1+900-XXX-XXXX. Calls which are placed using any alternative dialing pattern cannot be restricted.

Billed Number Screening

- A. Billed Number Screening allows the customer to notify the Telephone Company that they will not accept any Third-Number Billed and/or Collect calls for billing to their telephone number. The Company places information regarding this screening restriction into a data base that is normally accessed prior to such calls being completed that will refuse to validate the completion of such a call to the indicated number.
- B. Billed Number Screening can be ordered to screen third-number billed call, collect calls, or both.
- C. Non-Recurring Charges as outlined in Section 5 will apply to establish this service.
- D. Rates - No Rates for this service will be charged.

SERVICE RESTRICTIONS

Toll Access Restriction

- A. Toll Access Restriction provides a means of restricting access to the Long Distance Message Telecommunications Network. Three options are available to the customer:
 - 1. Restriction of 1+ calls only
 - 2. Restriction of 1+ calls and 0+ and 0- (operator handled) calls
 - 3. Restriction of 0+ and 0- (Operator handled) calls only.

- B. Restriction of 0+ and 0- operator handled calls prevents the customer from dialing a telephone operator for any purpose including for emergency or telephone assistance purposes. The Company shall not be liable to the customer or any third party for any and all claims, losses or damages caused by the restriction to any toll service.

VOICE MAIL

Voice Mail

A. General Description & Conditions

Voice Mail is a service that provides unattended answering of incoming calls places to the customer's telephone line when the called number is busy or does not answer. Voice Mail can answer calls, store messages, perform broadcast functions, and notify customers of stored messages. There are different types of Voice Mail service with varying levels of functionality.

Voice Mail is available where technically feasible.

B. Service Offerings

Voice Mail Service Offerings: are available to business and residential customers.

This service allows system messaging capabilities internally, and with other customers (i.e., allows customers to send and redirect messages to other voice mail customers).

Voice Messaging provides many options for intercepting calls and storing messages. Incoming calls are intercepted after a specified number of rings, when the line is engaged, or both. A stutter dial tone indicates that messages have been stored in the mailbox. Messages stored using Voice Messaging can be accessed from any touch tone signaling phone.

1. Basic Mailbox

This service stores 15 minutes of messages (new or saved). Each message can be up to 3 minutes in length. Messages will automatically delete after 15 days. Customers access the mailbox using a secured password, and are greeted with the number of messages recorded, as the mailbox is accessed. Service options include the ability to move through messages, edit messages, recover deleted messages, and a choice of stutter dialtone or customer provided lamp for message indication.

2. Standard Mailbox

This service stores 30 minutes of messages (new or saved). Each message can be up to 3 minutes in length. Messages will automatically delete after 15 days.

The Standard Mailbox includes all the features of the Basic Mailbox plus the ability to: mark messages private or urgent, allow timed delivery of messages, receive confirmation of messages sent, utilize a reply option, and compose or forward messages to other users or groups.

VOICE MAIL

Voice Mail (cont'd)

B. Service Offerings (cont'd)

3. Professional Mailbox

This service stores 45 minutes of messages (new or saved). Each message can be up to 3 minutes in length. Messages will automatically delete after 15 days. The greeting length on this service is up to two minutes.

The Professional Mailbox includes all the features of the Basic and Standard Mailboxes listed above, plus a group broadcast option.

4. Family Mailbox

A Family Mailbox allows callers to leave private messages for up to four persons at the same telephone number. This offering is structured through a main mailbox and three extension mailboxes. Party A uses the main mailbox, while Parties B, C and D use the extension boxes. Each extension mailbox has its own greeting that may be customized by the user.

Separate passcodes are used for each mailbox. Each passcode is set up through the main mailbox, and may be changed through the extension mailboxes.

The stutter dial tone indicator is activated when messages are left in the main mailbox. If there are new messages left in the extension mailboxes, but not in the mailbox, stutter dial tone will not be activated.

Messages may be sent to and from the main mailbox and the extension boxes.

5. Voice Messaging Optional Features

a. Remote Notification

Remote Notification enables the Voice Mailbox to dial a specified telephone number when a message is left in the mailbox. The specified telephone number must be in the local calling area. Notification may be canceled remotely.

There are three time schedules available for notification; Business Day, non-Business Day, and Temporary. Within each schedule, three separate time periods with different dialing instructions may be specified by the customer. Notification may occur for each new message, or only those marked urgent by the caller.

VOICE MAIL

Voice Mail (cont'd)

5. Voice Messaging Optional Features (cont'd)

b. Menu Options

Voice Menus routes callers through a voicemail system. Voice Menus can be used to create information bulletin boards, Guest Mailboxes for temporary visitors, time of day message control, caller prompts for replay of menu options and caller prompts for return to main menu

c. Fax On Demand

This service automatically disseminates information to callers that request it. The caller inputs a fax number where the information can be sent, and the service automatically sends the preselected information to the caller's fax number.

Subscribers to this service must submit to the telephone company the information that will be faxed to callers. This information will be in the format agreed upon by the telephone company and the subscriber, and must be on acceptable electronic media. The telephone company and the subscriber will work together to design the automated prompts that greet callers.

Changes to the Fax on Demand prompts must be made by the Telephone Company.

Regular Fax on Demand service is designed to handle 250 calls per 24 hour day. Subscribers having applications generating more than 250 calls per day must subscribe to High Volume Fax On Demand.

Five Voice Mail boxes are included with Fax on Demand Service for the purpose of establishing routes to options on the menu. If the subscriber requires more than five routes, that subscriber will be billed for additional routes.

Fax on Demand is available for a minimum period of one month
